-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

Election/Restrictions

Claims in the application are 1-15.

Restriction to one of the following inventions is required under
35 U.S.C. 121:

5 I. Claims 1-11, 14 and 15, drawn to a method for isolating a
polypeptide involving the use of an antibody and an antibody
capture affinity ligand (ACAL), and kit for carrying out the
method, classified in class 435, subclass 70.3.

10 II. Claims 12 and 13, drawn to a method of isolating a
polypeptide involving the use of an antibody and a nickel-
chelate resin, classified in class 530, subclass 415.

The inventions are independent or distinct, each from the other
because:

15 The methods claimed by inventions I and II require different
steps and components such that each can be performed without the
other. The method of invention I requires an antibody capture
affinity ligand that is not required by the method of invention II.
The method of invention II requires a nickel-chelate resin not
required by the method of invention I.

20 Examining inventions I and II together will be a serious burden
due to differences in searches and considerations for applying prior
art required due to inventions I and II claiming different method
procedures.

25 Because these inventions are independent or distinct for the
reasons given above and have acquired a separate status in the art in

Art Unit: 1651

view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be
5 examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically
10 point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or
15 species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

20 Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a

request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier
5 communications from the examiner should be directed to David M. Naff
